Plant, Algal and Fungal Taxonomy & Systematics

Vol 31, 2013

## Contents

Volume 31, 2013

Contributed papers	Page
An overview of the <i>Thelymitra nuda</i> (Orchidaceae) complex in Australia including the description of six new species ..... – J.A. Jeanes	3
The lichen genus <i>Lecidella</i> (Lecanoraceae), with special reference to the Tasmanian species..... – G. Kantvilas and J.A. Elix	31
<i>Phylloblastia blechnicola</i> (Ascomycota, Verrucariaceae), a new leaf-inhabiting lichen from southern Victoria, Australia..... – P.M. McCarthy and V. Stajsic	49
Two new species of <i>Nitella</i> (Characeae, Charophyceae) from arid-zone claypan wetlands in Australia..... – M.T. Casanova and J.L. Porter	53
<i>Maireana obrienii</i> (Chenopodiaceae), a new species from eastern Australia ..... – N. Walsh	61
A new mallee species <i>Eucalyptus phoenix</i> (Myrtaceae) from Brumby Point, East Gippsland, Victoria..... – W.M. Molyneux and S.G. Forrester	65
An examination of <i>Pterostylis xerophila</i> (Orchidaceae) and the confirmation of <i>P. lingua</i> as a new species in Victoria ..... – N. Reiter, M. Clements and K. Vlcek	69
Gynodioecy in <i>Teucrium racemosum</i> (Lamiaceae)..... – N. Walsh and E. O'Brien	77
The mycorrhizal associations of <i>Borya mirabilis</i> , an endangered Australian native..... – N. Reiter, A. Lawrie and N. Walsh	81

Volume 31, 2013

***Pterostylis xerophila* M.A.Clem.**  
**Source: State Botanical Collection**  
**Artist: Anita Barley**

*Pterostylis xerophila* is a member of subgenus *Oligochaetochilus* (Szlach.) Janes & Duretto. It is very rare in Victoria, known from only a few localities in the north-west of the state, where it is usually associated with rocky outcrops. It is known from similar habitats in South Australia.

*Muelleria* publishes research papers on Southern Hemisphere plant, algal and fungal taxonomy and systematics, particularly relating to Australia. Acceptable submissions include: taxonomic revisions; phylogenetic and biogeographical studies; short papers describing new taxa, documenting nationally significant new records, or resolving nomenclatural matters; historical analyses relevant to systematics; and any research contributing to our knowledge of plant, algal or fungal diversity. Special issues or reviews will be considered after discussion with the Editor.

Editor in Chief	Teresa Lebel (to September 2012) Tom May (from October 2012)		
Associate Editors	Daniel Murphy	Frank Udovicic	Neville Walsh
Production Editor	Alison Vaughan

## MUELLERIA INSTRUCTIONS FOR CONTRIBUTORS

**Submission.** The Editor, *Muelleria*  
Royal Botanic Gardens Melbourne  
Private Bag 2000, South Yarra, VIC, 3141  
muelleria@rbg.vic.gov.au

Deadline: August 31  
(papers may be submitted at any time)

Submit all material, including illustrations and tables, on CD or by email. Each figure and table should be supplied as a separate file. Vouchers for new species or for molecular or ecological research must be lodged at the time of submission. All papers are peer reviewed and should not be under consideration elsewhere. No page charges apply for black and white pages. Colour plates will only be considered after discussion with the Editor, and may incur a charge.

**Please read the instructions for authors at [www.rbg.vic.gov.au/research\\_and\\_conservation/publications/muelleria](http://www.rbg.vic.gov.au/research_and_conservation/publications/muelleria).**  
**Formatting.** Manuscripts should be double-sided with 1.5 line-spacing throughout, left-justified, with left and right margins of 2 cm. Body text should be 10 pt Times New Roman. All text should be in the font in which it will be published, i.e. **bold** or *italics*.

**Title.** The title should be concise and informative, and formatted in 12 pt, centred, bold type. Use minimal capitalisation.

**Author(s).** Authors' names, affiliations and addresses (including post code, state and country) should follow the title.

Addresses and affiliations should appear below the authors' names, keyed by superscripted numbers. Include the e-mail address of the corresponding author.

**Abstract.** Precede the main text by an abstract not exceeding 120 words, covering the scope of the work and findings. All new names and combinations made in the paper must be explicitly given in the abstract. Taxon names at genus rank or below must be accompanied by the nomenclatural authorities.

**Key words.** Provide 3–5 key words that are not used in the title.

**Main text.** The first paragraph of any section should be flush left. Subsequent paragraphs are to be indented, and not separated by a blank line. Three main headings should be used:

**Heading level 1**

HEADING LEVEL 2

**Heading level 3:** indented one tab space and followed by text on the same line.

Footnotes should not be used. *References* should be cited in text as, e.g. Walsh (1992), Brown and Murphy (2004); for three or more authors use *et al.* Within parentheses, cite multiple references in order of publication and use an ampersand (&) between authors' names: (Kuntze 1891; Lawrence *et al.* 1968; Allan 1979, 2000; Jarman 1990; Lewis & Entwisle 1995a, 1995b). Measurements should be in SI units. Use an en rule (–), not a hyphen, between spans of numbers, and use a multiplication sign (×), not the letter 'x', where appropriate. Scientific names at generic rank and below must be accompanied by the nomenclatural authorities when first introduced in the main text and also in the abstract. *Nomenclatural citations* must follow the rules and recommendations of the most recent *International Code of Nomenclature for Algae, Fungi and Plants*. Book titles must be abbreviated following *Taxonomic Literature II* (Stafleu & Cowan 1976–1986), and journal citations in the synonymy must follow *Botanico-Periodicum-Huntianum* (Lawrence *et al.* 1968). Authors' names must follow *Authors of Plant Names* (Brummitt & Powell 1992) and should have minimal spacing. Designations of herbaria should follow *Index Herbariorum* (Holmgren *et al.* 1990). Homotypic synonyms are to be included in one paragraph, listed in chronological order. Heterotypic synonyms should follow chronologically in separate paragraphs. Misapplied names should follow the heterotypic synonyms.

**Figures, tables and appendices.** Do not embed images in the text. Illustrations (including photographs, line art, graphs and maps) should be in TIFF or JPEG format, and must be at least 300 dpi at final size. Figures and tables may be single (7 cm) or double (14 cm) column width, full page length (18 cm), or in landscape format (18 x 14 cm). Illustrations require either a scale bar, or an indication of the magnification in the caption. Figure, table and appendix captions should be listed after the references.

**References.** Only publications cited in the text should appear in the Reference list. Include journal names in full. Floras in a series should be cited in book format.
